

13601 Fujitsu cable

ADVANTAGE AIR[®]

**Fujitsu cable
MyAir2 and Zone10.4 compatible**

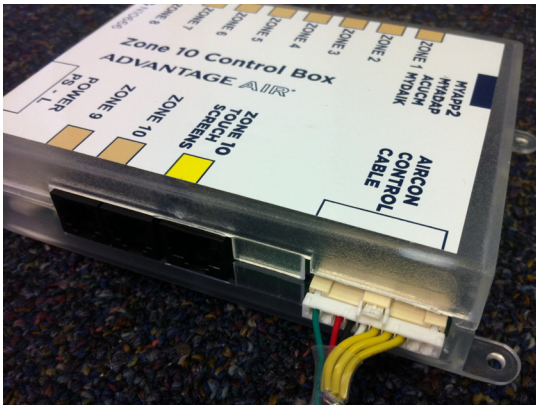

2012

INSTALL INSTRUCTIONS

03 October 2012

Revision 1.0

1. Turn off the power to the air conditioner
2. Connect one end of the Advantage Air unit control cable to the MyAir2 CB or Zone10.4CB:

3. There are three different types of Fujitsu units - locate the connectors on the indoor unit PCB (s) and connect as described:

Type A has CN114 and CN115. This type of unit needs a second cable connected also – this second cable is called the PREP cable. The PREP cable connects between CN106 and CN5.

Type B has CN102 and CN103 (match to the yellow colours on the Advantage Air cable). Do not use the PREP cable.

Type C has CN100 and CN103 (match to the red colours on the Advantage Air cable. Do not use the PREP cable.
